

Reasor, Reid D.
Candidate Questionnaire
Primary 2014

Name: Reid D Reasor, Lt Col (Ret) USAF	Office Sought: U.S. Senate (R) Texas
--	--

Home Address:

4803 Summerset Trail
Austin TX 78749

Campaign Phone: 719-649-6238

Cell Phone: 719-649-6238

Alternate Phone: 719-649-6238

Email:

reid.reasor@gmail.com

Website:

www.reasorforUSSenate.com

Facebook:

Colonel Reasor for U.S. Senate

Twitter:

None

Family Situation:

Married, three children

Education:

Please see biography

Source of income:

Business owner, retired veteran

Church affiliation & participation level:

Member of Bethany Lutheran Church, in Austin, Texas
Teaches high school youth groups
Teaches Physics in Christian home-school cooperative

Occupational History:

Please see biography.

1. Please explain your interpretation of the Tenth Amendment and the principle of nullification. Do states have a right of nullification? What should the federal government do if a state attempts nullification?

There should be no interpretation of Article V and the Tenth Amendment. One of the key foundations of the difference in American vast success is that the central government may never take power from the states and the people that the states do not willingly yield to the Fed by the ratification process.

We are the first country in the history of the world to do this ... and combined with our Bill of Rights, it is the key to our success.

Today we do not have ANY compliance of the Tenth Amendment, nor of Article V, by the Senate and Harry Reid.

82 Senators illegally voted down the Fourth Amendment of the inalienable Bill of Rights, and these 82 senators and 219 representatives need to be arrested.

They have violated their oath ... Reid, McCain, McConnell, Graham and our own senator ... Cornyn.

2. What have you done, or will commit to do, to reduce federal spending? Where specifically do the cuts need to be made?

There should not be ANY increases in federal spending, nor ANY increases in the debt. We are on the border of destroying free markets as 38-42% of the taxation rate is when free markets fail (European model).

We are on the border of totally destroying our ability to produce wealth.

The federal government should get off its collective backsides and get itself out of debt using the vast resources it has in land holdings and natural resources. Get our industry back, and control the means of production that causes pollution overseas (20 of the 30 worst polluted cities are in China).

Every federal program should be used to first address and transition the 80 million people on government assistance (\$720,000,000,000 a year) from taking away from wealth generation into self-sustaining, privately-owned, free-market economy (The opposite of what the left is trying to do ... kill the free markets and place people on government assistance for the purpose of control).

Creativity, curiosity, innovation and commitment are destroyed with central control.

3. At what point should the "right to life" or "personhood" be granted to new human beings (e.g., at conception, birth, 5 days old, etc)? What action, if any, will you take to reflect this in law?

I believe that the human soul exists in an unborn child well prior to birth, as documented in Psalm 139. We need to address what abortion really is ... power. Women who do not want to have unscrupulous men have power over them might choose to have an abortion to remove that power.

Abortions should be banned for every case that uses blood for politics and power. Abortions should only be allowed for rape, incest and threat to the mother (as defined by the doctor, not the mother). I also would add adultery, abandonment and abuse of the mother, only when there is no heartbeat in the unborn child.

Federal funding of death should stop ... fund life and fund adoption.

We should support and fund life, and I have worked with crisis pregnancy centers and have invited several unwed mothers into our home, to provide them a place to live. As we have funded death, we should fund life. I also support the Texas sonogram bill, requiring every mother to look at and be educated about the child they are about to abort.

4. Please list all rights to which non-citizens are entitled.

I do not support any action, or any legislation, that gives an illegal alien any rights or privileges over those immigrants who desire to come here legally.

Seal the border with Mexico while still allowing rancher and farmer access to the river. No actions should place an illegal immigrant above the position of an immigrant waiting to come here legally.

Address illegal immigration in our state by enforcing existing laws, including prosecution of employers, and focusing on the three different types of illegal aliens that are here:

- a. For those who are here who are with intentions to work (the majority), they may stay as prosecuted felons with probation that removes their ability to vote and own a weapon. The length of probation would be the time required for them to go to the back of the line and then wait their turn behind immigrants who are coming here legally.**
- b. For those who cause harm with criminal activity, prosecute, imprison, and deport them.**
- c. For those who are here to freeload on our economy, identify and deport them.**

5. Please list at least three (3) federal agencies that most clearly fall outside the scope of the U. S. Constitution and should be scaled back or phased out.

1. Education - There are three areas of unrestrained corruption in our country: government, media and academia. The U.S. Department of Education is one of the most dishonest, most corrupt organizations. Education should be state equipped and locally controlled.

Central control kills education, it kills creativity, curiosity, innovation and determination – we have gone from the best in the world to the worst while spending the most. American teachers are the highest paid teachers in the world, but 50% of all new teachers quit in five years, sick of the control from the system.

2. The Department of Homeland Security needs to become a subset of the Department of Defense. Military equipping and force projection of the DHS is a violation of the Posse Comitatus Act. The congress should be the branch of the federal government that equips, trains, provides and supervises the armed forces, not the president to have his own domestic force.

3. The Environmental Protection Agency needs to change and become the Environmental Management Agency. It will have a new mission to ASSIST and help businesses be successful, and provide research and development costs, as well as equipment for clean operations, instead of the punitive, job-killing agency that it currently is.

4. The Elections Assistance Commission

5. Corporation for Public Broadcasting (all PBS)

There are at least 12 more where their functions could be eliminated or consolidated. All agencies need to assist in the crisis against the top five.

6. What should the U.S. Strategy be in dealing with the unrest in the Middle East?

We need to understand the middle eastern mind and the source of the fighting that dates back more than 4000 years to Abraham, Isaac and Ishmael. The Arabs will always be unstable and aggrieved based on the history of the promised land, the promised blessing of God, the genetic history (they are all cousins) and who claims Abraham as their forefather. There will be no peace until this history is addressed.

In the interim, the real discussion (there won't be any – see Genesis 16:10-12), we should stand solidly by Israel. Iran should not be allowed to gain nuclear capability, nor should any nation, in accordance with the nuclear non-proliferation agreement.

In addition, we should immediately destroy the four IED plants in Iran that have killed the most U.S. personnel in the middle east. Economic sanctions should continue as long as Iran remains intent on destroying Israel (“From the river to the sea, Palestine will be free.”).

7. There have been several mass shootings in recent years. What, if anything, should the federal government do to solve this problem?

They should listen to their own research. The DOJ, DSH, FBI, and INTERPOL all say that an armed society is a polite, safe and crime-free society; criminality should be dangerous to the criminals.

The reason for guns is so the guilty strong will not overpower and hurt the innocent weak. The government today is part of the guilty strong, and they have removed the ability of the innocent weak to defend themselves.

People say they do not want a “wild west” shootout, but we already have shootouts in the four “gun free” cities of D.C., Chicago, New Orleans and Detroit. In these cities, 80% of gun deaths occur.

Since the unconstitutional addition of “separation of church of state” in 1963, we have lost the thinking that we can teach ethics to kids. We need to start teaching solid morality, selflessness, service, integrity and honor.

We need to attack the dishonor of our academics. Those who teach hate for our country in our schools and universities need to held accountable for the action for the far leftists they create. EVERY ONE of the recent “shooters” has been a left-wing activist bent on punishing people for social (U.S. Constitutional freedom) norms.

8. Please explain your interpretation of "separation of church and state" and list some actions you have taken that illustrate your position.

The very first action, of the very first constitutional convention was to fight over human rights and document in inalienable law that the state would never be allowed to take our freedoms.

The first line of the very first amendment says “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.”

“Separation of Church and State” is not in the U.S. Constitution, nor in any founding document, nor is even mentioned in any of the Federalist Papers.

It is the U.S. Supreme Court that manufactured the term against 157 legal precedents that were presented that outlined the religious freedoms prior rulings. The court ignored the legality of the previous precedents and resurrected the term in 1963 from Thomas Jefferson’s obscure private, nonlegal, nonfederal government letter that he wrote to the Danbury Baptists to assure them that a rival faith was not going to be named a national religion.

The court just made it up and got it wrong, as Jefferson wrote assurances that “there is an inseparable wall between church and state.”

Today, college professors have more freedom than our churches. The IRS needs to get off the back of the churches, and remove the ridiculous provision that ANY political activity of the church will result in being taxed out of existence. The civil rights movement would not have happened with the IRS punitive actions of today.

9. Briefly explain your position on the federal role in education and your thoughts about Common Core.

See my comments about closing the U.S. Department of Education. Common Core is communism, our colleges and universities are corrupt, and in the tank for communists/statists/socialists/globalists.

Education reform needs to be on a five-point, state-led plan to dismantle the central control system in effect today.

1. Change the mission to: “Assist the parents in preparing their children for their individual children’s futures.
2. Resource the classroom – no more than 10-12 children per class, with 15 max in emergencies. Social psychology has the evil of mob mentality starting at 15.
3. Resource the leadership – the principal cannot care for 110 teachers. Mid-level management and layers of leadership with a tiered pay scale according to performance and leadership; remove tenure. Empower the principal and get out of the way.
4. Remove higher levels of control above the principals, between them and the state board of education. Texas has 57 superintendent, six-figure, PhD-level control offices (at a salary of 250K-476K per year), which kills educational creativity, curiosity, innovation and determination.
5. Provide tools for local involvement in the classroom and curriculum as needed by the local community.
6. Let people leave failing schools.

10. What are the mandatory components of a viable Guest Worker program and what criteria would you require for each factor?

American workers come first.

Let me repeat: American workers come first. If our REAL unemployment rate is above 5%, we need to restrict the foreign worker program to give more opportunity for Americans to be free of government control by government dependency.

11. What is the federal government's proper role in the delivery of healthcare and what specific approach do you propose to get us there?

The role of the federal government is to **PROVIDE** for the common defense and **PROMOTE** the general welfare. IF the free markets cannot provide for healthcare affordability, then the federal government should only supply the means for the poor to purchase healthcare on the free markets--a voucher for 1.01 of the poverty level (our U.S. "poverty" level is middle-class European living).

The purchase of healthcare with the vouchers will allow healthcare costs to lower as the paying base increases. Cost is \$85 billion a year ... just 15 aircraft carriers a year ... much less than the \$600 billion a year cost of the illegal and unconstitutional ACA.

Allow people to not purchase if they desire, and select the ability to not be covered. Let them make their own arrangements.

12. What individuals and/or organizations should have the right of exemption for religious reasons to aspects of ObamaCare that violate their religious beliefs? To what extent should they be exempted?

The ACA violates the guarantees of First Amendment freedom of religion, it violates the Fourth Amendment right of privacy, it violates the Tenth Amendment, it violates Article V and Article 1 Section 7 (All revenue bills must originate in the house, but the ACA originated in the senate).

Everyone should be exempt. I support a full repeal.

13. Please describe a couple of life events and/or people from the first 40 years of your life that drove who you became as a person and a legislator.

I am not a legislator. We have too many politicians and lawyers and not enough historians, scientists and warriors.

When I was 23, I planned and led a mission where 14 people died, and I had to watch them burn to death. I pledged then that if anyone would ever subvert or attempt to destroy the U.S. Constitution and the Bill of Rights, I would fight them. I took an oath that does not expire in my 20 years of service, and my service to my country does not end with retirement.

I enjoyed the 20 years of teaching the most complex technologies and employment doctrine in the F-15, and spending time with young men, forging them into selfless warriors--often a challenge in today's society of self.

My career was cut short by a four-year fight with leukemia caused by a new phased array radar; four of my friends also contracted the cancer, and two have died. For them, and for the 700,000 others who died for our freedoms, we must get our freedoms back by all means available.

What is required is will and dedication to our Constitutional oaths.

14. Please describe under what specific circumstances governmental rights or interests should override parental rights or interests in regard to the welfare of children.

Never – the only time the government should have any rights is if all the family and relatives are dead.

15. Please list the most recent three (3) pieces of key legislation, how you voted (or would have voted) on each, and why.

The ACA – I would have voted down the bill and voted down the funding. I would have voted down the cloture. I would have voted down the NDAA for violation of the Sixth Amendment. I would have stopped the vote on changing the Second Amendment, because it is an illegal (outside of Article V) vote.

The senate has no power to change the Bill of Rights; even voting on changing the Bill of Rights without proposing amendments for ratification by the states is illegal. We might need to arrest some legislators.

I would have removed the power of the president to conduct unrestricted drone warfare, as I am against offensive drone operations in peacetime. A hellfire missile is not a surgical strike ... Navy SEALs are.

I would have voted against ANY funding for anything in Diane Feinstein's illegal NSA spending and spying, and would expose the black protocol cover-up of the 800 local fusion centers across the U.S.

EVERY illegal fusion center needs to be closed.

What are needed at this point against the incredible corruption are independent prosecutors for Obama/Holder/Sebelius/IRS/DOJ/ and the attached list of potential illegal actions in my lengthy screed.

16. What changes do you support to federal entitlements to make them affordable?

Get the fed to get itself out of debt. All the research shows that the majority of people on TANF (welfare) want to work. We are already paying \$46K a year per each person on welfare. Change the EPA to the Environmental Management Agency, and go after the almost unlimited resources the federal government has on federal properties ... oil, gas, gold, silver, timber, iron ore, heavy metals, etc., and get the people who are taking wealth to become people who are generating wealth.

Pay off the national debt with raw materials; decrease taxes as the debt servicing decreases and get out of the way, and off people's backs.

17. What measures can Congress take to ensure the preservation of traditional family values and what is your commitment to fight for those measures?

Restore the First Amendment guarantee of freedom of religion. Remove the IRS penalties to churches that are active in the community and politics. Churches should be able to say whatever they want, whenever they want to.

Teach ethics in school, ensure local control of schools, ensure community involvement in schools, ensure school choice to escape failing schools.

Enforce the laws on the books, and fight government control of land rights and parental rights.

18. What issue will be the focal point of your attention in 2015? Describe what makes you passionate about that issue.

I have five points of focus that will require constant attention to restore our republic:

- 1. Inner city decay caused by failed education, no jobs and no ownership;**
- 2. Federal criminal actions against the U.S. Constitution, destroying liberty;**
- 3. Debt and currency collapse;**
- 4. Economic stagnation and depression; and**
- 5. Culture war.**

19. What are the pros and cons of central banking? Please include in your discussion the Federal Reserve in particular and its policies and actions.

The Rothschild banks and the IMF have pulled strings for too long. I am a solid believer in the evil of central banking and their desire for globalism under their economic thumb.

We can lose our liberty to evil of communism/socialism just as easily, if we lose our currency and our freedoms to debt.

It is one of the five pillars set against our ability to survive as a nation. We need more credit unions, local banks and lending intuitions against the cabal and the IMF.

Audit the Federal Reserve and restore our currency backed by gold, solid backing with the ore that is mined and smelted by the vast number of people who want to transition from welfare to work.

Remove IMF control of the FED. Restore the FED control under congress.

20. What actions should America take in regard to Iran's nuclear capabilities?

Iran should never become a nuclear nation, ever. The middle eastern conflict dates back more than 4000 years and will not be overcome by simple negotiations.

The middle eastern mind will use the weapon as soon as the capability exists. Additionally the four IED plants in Iran (that have been working continuously since 1990) need to be destroyed, and should have been destroyed 23 years ago. Close them, or lose them.

As long as Iran continues the move to nuclear capability they must have sanctions and interventions. Operational capability must be interrupted by whatever means that are required.
